

Analysis and development of a Battery Management System for agricultural field robots

Lasse Engberg Andersen

Martin Skriver

December 4, 2014

Abstract

Contents

Abstract	1
Preface	2
I Introduction	3
II Analysis	4
1 Introduction	5
2 System requirements	6
3 Preliminary Research	7
3.1 Power Consumption Test	7
3.1.1 Introduction	7
3.1.2 Test description	7
3.1.3 Results	7
3.1.4 Discussion	7
3.1.5 Conclusion	7
4 Battery Selection	8
4.1 Introduction	8
4.2 Types of batteries	8
4.3 Choice of batteries	8
4.4 Conclusion	8
5 Battery Management System	9
5.1 Introduction	9
5.2 Types of Battery Management Systems	9
5.3 Choice of Battery Management Systems	9
5.4 Conclusion	9
III Design and Development	10
IV Conclusion	11

Preface

Part I

Introduction

Part II

Analysis

Chapter 1

Introduction

Chapter 2

System requirements

Chapter 3

Preliminary Research

3.1 Power Consumption Test

3.1.1 Introduction

3.1.2 Test description

3.1.3 Results

3.1.4 Discussion

3.1.5 Conclusion

Chapter 4

Battery Selection

4.1 Introduction

4.2 Types of batteries

4.3 Choice of batteries

4.4 Conclusion

Chapter 5

Battery Management System

5.1 Introduction

5.2 Types of Battery Management Systems

5.3 Choice of Battery Management Systems

5.4 Conclusion

Part III

Design and Development

Part IV

Conclusion
