

Analysis and development of a Battery Management System for agricultural field robots

Lasse Engberg Andersen

Martin Skriver

December 8, 2014

Abstract

Contents

Abstract	1
Preface	3
I Introduction	4
II Analysis	5
1 Introduction	6
2 System requirements	7
3 Preliminary Tests	8
3.1 Power Consumption Test	8
3.1.1 Introduction	8
3.1.2 Test description	8
3.1.3 Results	8
3.1.4 Discussion	8
3.1.5 Conclusion	8
4 Powertrain Analysis	9
5 Battery Selection	10
5.1 Introduction	10
5.2 Types of batteries	10
5.3 Choice of battery type	10
5.4 Conclusion	10
6 Battery Management System	11
6.1 Introduction	11
6.2 Types of Battery Management Systems	11
6.3 Choice of Battery Management System	11
6.4 Conclusion	11
7 Hardware Requirements	12
8 Preliminary Battery Management System	13
8.1 Introduction	13
8.2 Design	13
8.3 Results	13
8.4 Discussion	13
8.5 Conclusion	13
9 Safety requirements	14
III Design and Development	15
10 Introduction	16

Preface

Part I

Introduction

Part II

Analysis

Chapter 1

Introduction

Chapter 2

System requirements

Chapter 3

Preliminary Tests

3.1 Power Consumption Test

3.1.1 Introduction

3.1.2 Test description

3.1.3 Results

3.1.4 Discussion

3.1.5 Conclusion

Chapter 4

Powertrain Analysis

Chapter 5

Battery Selection

5.1 Introduction

5.2 Types of batteries

5.3 Choice of battery type

5.4 Conclusion

Chapter 6

Battery Management System

6.1 Introduction

6.2 Types of Battery Management Systems

6.3 Choice of Battery Management System

6.4 Conclusion

Chapter 7

Hardware Requirements

Chapter 8

Preliminary Battery Management System

8.1 Introduction

8.2 Design

8.3 Results

8.4 Discussion

8.5 Conclusion

Chapter 9

Safety requirements

Part III

Design and Development

Chapter 10

Introduction

Part IV

Conclusion
